Zeny 5 in 1 Cavitation, Radio Frequency Machine

Our Zeny 5 in 1 machine has the latest technology and has been designed to help you look younger and to address weight loss and body shaping along with anti-aging capabilities. This machine has the capabilities to do the following treatments.

* **40k Cavitation Function:** This function sends powerful shock waves and penetrates into the fat cells breaking up the fat cells and allowing them to disperse.

* **Radio Frequency Vacuum & Bipolar Function:** For body and face reshaping with weight loss capabilities, this function will promote tissue metabolism and repel cellulite.

* **Body RF Function:** This function will dissolve fat, expedite lymphatic drainage and firm the skin and enhance skin elasticity.

* **Face Radio Frequency:** Helps eliminate facial wrinkles and tightening and lifting of the skin

* **Tripolar Radio Frequency:** Also referred to as high frequency AC change that allows high-frequency currents of more than 10,000 times a second to help eliminate wrinkles and tighten loose skin.

Features & Functions

1. The entire process is completed without the need of surgery or anesthesia.

2. Does not cause the phenomenon of uneven skin.

3. Does not cause the bleeding, swelling or blood stasis.

4. No side effects or the risk of gaining the weight back (Rebound effect), the results will become very obvious within a few treatments.

5. Non-invasive treatment, no downtime.

6. Firms the arms, legs, thighs, buttocks, waist, back area, abdominal muscles and contouring the body.

7. Improve and treat the orange peel like fatty tissues of different levels with the effects of soothing, decompression and pain relief (such as joint pain, Sciatica), promotes the regular mechanical aerobic exercise of skin tissue, rapidly relieve stress and remove fatigue.

8. Firming and lift and compact the skin and rejuvenates the face. Also creates circulation and activate cells, promotes metabolism thus producing more collagen and elastic fibers for improving the facial and body skin.
Here are the following Functions for the 5 in 1 machine

1) With controlled depth technology, inlaid diamond particles of different sizes will rub skin along its pattern and adjust suction strength by means of vacuum draw and rub with negative pressure and strong force to directly dissolve the fat. Thus, the effects are very obvious in just a few short treatments. Also other benefits are enhance blood circulation, accelerate the decomposition of fat, removes toxic waste and this enhances the effect of removing cellulite, effectively improve the state of areolar tissue, remove and removing stubborn fat.

2. These treatments will allow the removal of stubborn fat with the strong sound wave of 40,000HZ that is emitted to human body for impacting fat cells and causing friction between fat cells. This can cause effective consumption of calories and moisture in fat cells thus reducing the size of fat cells. What’s more, sound wave vibration may cause severe impact of fatty cells to make them be exploded simultaneously thus reducing the amount of fat cells and thereby achieve the effects of fat removal.

3. Body Vacuum RF Probe is for body and face re-shaping. Weight loss vacuum and RF fat-explosion technology can promote tissue metabolism, repel the cellulite, which make fat granule in different depths and shocking allowing fusion energy and the deepest receptor can get granule in 3CM thick of skin and rapid expansion and the rapid heating of the cell wall that exceed the elastic limits and arises to break cells so that the combustion of fatty acids at the same time and not only the burning consumption of fatty acids but also more directly reducing so it will rapidly reduce the size of granule

4. Facial wrinkle elimination, tightening and lifting Facial RF head A capacitive coupling electrode is used for transmitting radio-wave energy and generating an electric field for entering into subcutaneous tissue through the skin surface. In the high-frequency of 450 khz, this electric field changes its polarity at a rate of 450,000 times per second. To reply to the rapid change in electrode, directions of electrical particles the skin are also changed. By this time, natural electric resistance in the subcutaneous tissue moves and generates heat energy.

5. As the papillary dermis collagen may immediately shrink when the temperature is within the range from 60 to 70 Celsius (140 to 158 degrees), after this wrinkle treatment, client may immediately sense the skin tightening effects as it is being lifted and firmed. When collagen is produced continuously, thickness and density of the skin papillary dermis may be increased to remove wrinkles, helps eliminate scars, restore skin elasticity and healthy glow and make it be refreshed and smooth. While collagen is increased, fresh skin is then generated and wrinkles are removed. In addition, when you have cortex without elasticity or that with thick horny layer in the area with wrinkles is separated, surrounding skin will also be renewed.
6) Negative pressure RF liposuction head Press "TIME SET" to adjust the time, adjust the operating rod "RF CHANNEL" to "FACE" (this will start facial RF head treatment), adjust the operating rod to "RF CHANNEL" to "BODY" (this start body vacuum RF head treatment), press "PAUSE THERE ELECTRODE RF" to start RF operation, press "RF ENERGY" and then "+" to increase the RF intensity or "-" to decrease RF intensity, press "AIR PUMP PAUSE" to start the operation of negative pressure vacuum RF head. Apply gel to the negative pressure vacuum RF liposuction head, point it to the position for losing weight and operate in pulling technique (drag fat at the position for losing weight to the position where it is closer to the lymph gland) for about 20 minutes.

**Important Notes.**

1. Spread medical grade radio frequency gel on the treated areas evenly. **DO NOT DO TREATMENTS WITHOUT GEL.**

2. **Start with low-energy.** We suggest to try for the proper energy level on the back of clients' hands before using on body of them

3. **Do not use essential oil as the medium**

4. In operation, start pulling only after negative pressure head is attached to skin.

5. Turn off the instrument probe when it is not in use.

6. Keep close contact between the probe and the skin.

7. Adjust the intensity from low level to high level.

8. Please avoid direct contact with eyeball colored light.

**Operational Steps:**

Plug the machine in, once you do that then locate the red button on the back of the machine, once it turned on you should be seeing the image(s) below.
Probe Description from Left to Right.

1) Body Radio Frequency Probe (For The Body)
2) Cavitation Probe (For the Body)
3) Tripolar (For The Face)
4) Radio Frequency (For The Face)
5) Bipolar Vacuum Suction Probe (For The Body)

After you hit enter on the image above then you will see this screen. Press on the treatment option you wish to use.

Below are the 5 screens you will see once you enter the machines operational stages:
You then adjust the settings. **Intensity setting and should always be used at lower levels to begin treatments to make sure there is no adverse effects.**

Press "TIME SET" to adjust the time, select the strength of "LOW", "MIDDLE" or "HIGH" by clicking "-" to decrease the strength or click "+" to increase it. Press "PAUSE" to start the strong sound wave explosion fat head Mode A.B.C.D means that:

"A" is continuous working for 3 sec and discontinuous for 2 sec.

"B" is continuous working for 4 sec and discontinuous for 3 sec.

"C" is continuous working for 1 sec and discontinuous for 1 sec.
"D" is continuous working for 0.5 sec and discontinuous for 0.5 sec.

In other words, A is the highest level with D being the lowest, so again you should always start at a lower setting on the first treatment to make sure clients are comfortable before moving to higher settings. Recommended starting level is 3.

Operation Guide.

THIGH Treatment time: Up to 30 minutes
1. From down to upper, pushing to the groin to dredge the lymph.
2. From down to upper, circling push by anticlockwise, can help decomposing fatness.
3. Also can push by come-and-go to decompose fatness.
4. Pull from the knee and muscle texture to upper, can improve the curve. Treated time: 20 to 30 minutes
1. Along the lymph direction, pulling to the waist.
2. From upper to down, by anticlockwise gesture, pull come-and-go.
3. Along the muscle of arm, pull up to lift and tight the muscle.

BACK Treated time: 20 to 30 minutes
1. First by come-and-go, pushing the bladder nerve 2 to 3 times.
2. Circling by anticlockwise to stimulate the underarm lymph node.
3. On the back, by antidockwise circling, can help to decompose the fattiness.
4. Using lymph drainage gesture, pull the toxin to the lymph node, can help improving the back curve.

ARMS Treated time: 30 minutes BACK SIDE
1. From the inner elbow to the armpit, doing lymph drainage.
2. Circling to stimulate the lymph node.
3. By anticlockwise or come-and-go pushing, decomposing the fat.
4. From the elbow to the oxter, doing tightening gesture.

Facade 1. From the elbow to the oxter, doing tightening gesture.

Abdomen Treatment time: 20 to 30 minutes
1. From small to large, by clockwise direction, circling around the navel, can help peristalsis of the large intestine.
2. From small to large, anticlockwise direction, circling push down.
3. From the belly and muscle texture, pull towards the groin.
See the charts below instructions on how and where to use the probes

**ILLUSTRATION of OPERATION**

Thigh
- Treated time: 30 minutes
- (1) From down to upper, pushing to the groin to dredge the lymph.
- (2) From down to upper, circling push by anticlockwise, can help decomposing fatsness.
- (3) Also can push by come-and-go to decompose fatsness.
- (4) Pull from the knee and muscle texture to upper, can improve the curve.

Buttock
- Treated time: 20 to 30 minutes
- (1) Along the lymph direction, pulling to the waist.
- (2) From upper to down, by anticlockwise gesture, pull come-and-go.
- (3) Along the muscle of arm, pull up to lift and tight the muscle.
Back
Treated time: 20–30 minutes
(1) First by come-and-go, pushing the bladder nerve 2 to 3 times.
(2) Circling by anticlockwise to stimulate the underarm lymph node.
(3) On the back, by anticlockwise circling, can help to decompose the fatness.
(4) Using lymph drainage gesture, pull the toxin to the lymph node, can help improving the back curve.

Arm
Treated time: 20–30 minutes
BACK SIDE
(1) From the inner elbow to the armpit, doing lymph drainage.
(2) Circling to stimulate the lymph node.
(3) By anticlockwise or come-and-go pushing, decomposing the fatness.
(4) From the elbow to the outer, doing tightening gesture.

Facade
From the elbow to the outer, doing tightening gesture.

Tips for better results and a healthier you.

It’s very important to understand that with any technology or weight loss program to understand how our body works and what to avoid when doing these treatments for the best results. Great results are easier obtained when following a sensible diet, exercising and treating these treatments no different than other methods of removing toxins from our body or a deep tissue massage. Here is a few tips to help the process along and to see even better results. Of course consult with a physician prior to treatments or any diet changes.
A) Drink at least 64 ounces of (warm water is preferred) every day, the day of the treatment drink as much water as you can (up to a gallon) to remove the toxins faster. (adding Lemon with your water also helps with weight loss and energy) 
B) Eat a sensible diet avoided unnecessary fatty foods and eat more fruit and vegetables 
C) Over the counter herb Milk Thistle maximize the detoxifying and cleansing of the liver 

Technical aspects of the 5 in 1. 

With collective strong sound waves along with strong sound wave of 40000HZ will allow vibration of fat cells and produce numerous vacuum air pockets inside and outside the fat cells, robustly impact fat cells to generate introverted blast and disintegrate triglyceride into glycerol and free fatty acids. 

Then RF waves at frequency of 1M HZ is used for exhausting the integrated glycerol and free fatty acids through hepatoenteral circulation. Finally, vacuum RF and energy electrode are used for positioning and tightening fat. In physics, it is known as "cavitation". Micro pore introverted blast inside and outside cell may lead to enhanced molecular motion and a higher energy level and this will finally cause fat cell rupture and thereby achieve the effects of body building and losing weight. 

Warnings 

Those that should not use the machine: 

1. Pregnant women or women during menses. 
2. Epileptic 
3. Patients with malignancy. 
4. Patient who recently has surgery 
5. Acute inflammation or epidemical patients. 
6. Those with heart diseases or with heart pacemaker.. 
7. Whom with kidney (gall-stone) disease? 
8. If you have embedded metal object (I.U.D) or silica gel? 
9. If you’re menstruating 
10. Those who are heat sensitive. 
11. Who has the genetic hypersensitivity? 

Other precautions. 

1. Be sure to use the medical grade ultrasonic gel. 
2. Avoid knocking the head.
3. For avoiding burning the head, during operation, please prepare enough ultrasonic gel.

4. Don’t leave the wand in one place, avoid needlessly treating the bones.

5. Don’t use disinfectant product to disinfect the head. We suggest the wet cotton or dry towel enough.

6. Check the machine power cord if it is connected well.

7. Do not keep the machine on while not in use.

8. Please take off all metal decoration from the operator and patient’s body.

9. Do NOT use the machine longer than an hour.

10. During these treatments, be sure not to accept other treatments as it may interfere with these treatments. As always consult with a physician prior to any treatments or diet changes.

Technical Parameters

40K cavitation head: Power supply output: 150V ; Frequency:40KHz ; Power:25W

Vacuum and Bipolar RF head: Power supply output: 66V; Frequency:450K; Power:95W

Body RF head: Power supply output: 66V; Frequency: 550K; Power: 50W

Tripolar RF head: Power supply output: 66V; Frequency: 450K; Power:35W

Face RF head: Power supply output:66V; Frequency:450K; Power:35W

Technical Specifications

**40 K Cavitation**

Max power consumption <50 W

Frequency: 40,000 MHZ

Mode Firm/Shape

**Body Radio Frequency**

Frequency: 1 MHZ

Radio Frequency Power <40 W

**Face Radio Frequency**

Frequency: 1 MHZ

Radio Frequency Power <40 W

**Tripolar Radio Frequency**

Frequency: 1 MHZ
Radio Frequency Power: <40 W

**Vacuum & Bipolar Radio Frequency**

Frequency; 1 MHZ

Radio Frequency Power<40 W

General Touch Screen

Power:<80 W

Operating Voltage 220/50 HZ—110/60 Hz

Package Size 22” X 16”

GW 50 LBS
